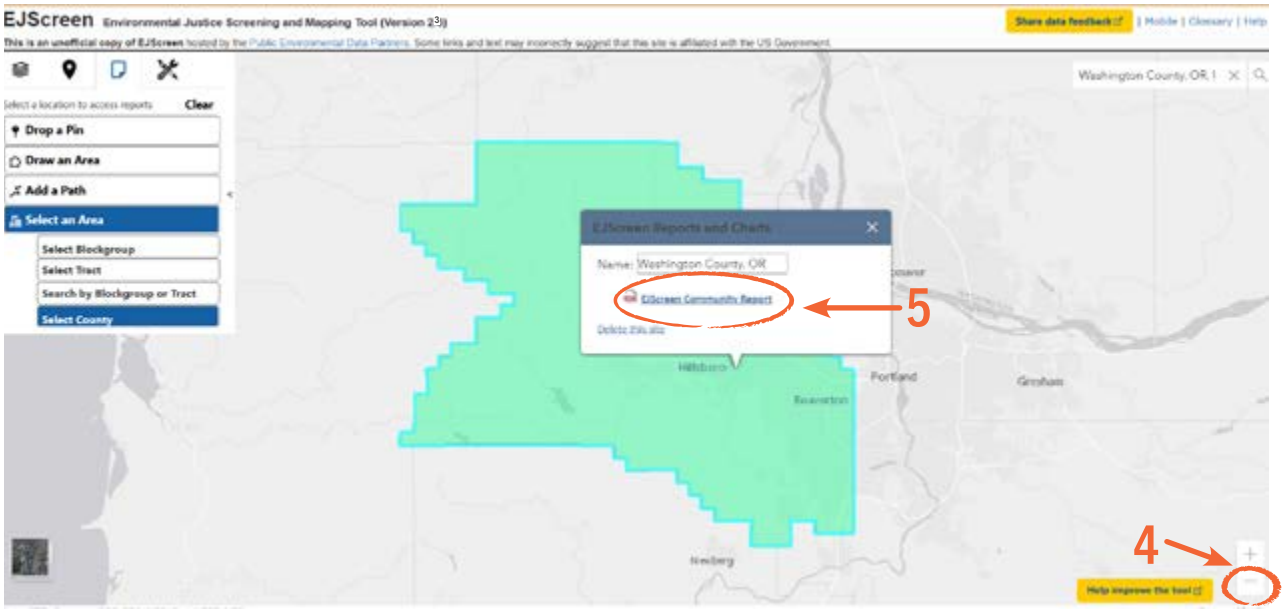
NAME _____ DATE _____

Use the EJSCREEN tool or other online tools to collect data for your assigned county. Create a visual display using data you collect and record on the following page.

To find information about your assigned county with EJSCREEN:

1. In the box at the top right labeled "Find address or place," enter the name of the county and state (such as Washington County, OR).
2. On the left, click on "Reports" to open a drop-down menu.
3. Choose "Select an Area," then "Select County," and then click anywhere on the map to highlight the county boundaries and open a pop-up window called "EJScreen Reports and Charts."
4. You may need to hit "-" on the zoom controls multiple times to zoom out and see the whole county.
5. Select "EJScreen Community Report" (entering a "Name" is not required). This will generate a downloadable PDF Report detailing population data, environmental indicators, and health statistics for the selected county. To explore other variables, click on the "Maps" icon and select a topic from the drop-down menu, which includes Environmental Burden Indicators, Socioeconomic Indicators, Health Disparities, Climate Change Data, and more.



NAME _____ DATE _____

County: _____
