Mathematics

Correlation of Wisconsin’s Model Academic Standards to Project Learning Tree’s PreK-8 Environmental Education Activity Guide
Wisconsin's Model Academic Standards

Our state has established rigorous goals for teaching and learning in 18 subject areas. As defined in the introduction to each document:

Academic standards specify what students should know and be able to do, what they might be asked to do to give evidence of standards, and how well they must perform. They include content, performance, and proficiency standards.

- Content standards refer to what students should know and be able to do.
- Performance standards tell how students will show that they are meeting a standard.
- Proficiency standards indicate how well students must perform.

Paraphrased Standards

In this document, you will find that the performance standards have been reworded to fit the tables. We hope these shortened statements will give some meaning to the numbers and letters of the standards as you refer to the tables. While every attempt has been made to preserve the intent of the standards, you should always consult the original wording for clarification, reference, and further correlations.

About These Correlations!

Project Learning Tree (PLT) is a set of environmental education activities that focuses on forestry education. The hands-on interdisciplinary nature of the activities makes them ideal for meeting the needs of educators and students. We hope these correlations help to facilitate the infusion of PLT activities into Wisconsin's classrooms and other educational settings.

Disclaimer

Correlating written activities with the standards is challenging and subjective. Since you may have a different perspective on the standards and the activities, consider these charts as starting points for selecting and using PLT activities.

Direct Relationship

Only direct relationships have been identified. For example, if the use of mathematics is a primary focus of the activity and a performance standard is directly addressed, the standard is marked with an "★". If the use of mathematics is secondary or the performance standard is simply reinforced, the standard is marked with a "●". Incidental references to standards have not been correlated. For example, every PLT activity containing references to numbers could be correlated to the A.4 or A.8 content standards in Mathematics.

Main Activity Only

To limit the scope of this project, correlations have not been made to variations, extensions, enrichments, or assessments. In some activities, these enhancements more completely address some of the academic standards.

Correlations Make No Assumptions

These correlations are based on the way the activity is written. They do not take into account the myriad of ways the activity could be modified to address a standard more directly or completely. In addition, if the content of the standard is referred to in the activity's background, but the students do not act on the information in the written activity, it is not included in the correlations.

Links to PLT Activity Descriptions

In the electronic version of this document, click on the name of the PLT activity to jump to a description of the activity. Each description includes the following: objectives, grade levels, subjects, and a complete listing of correlations to English Language Arts, Environmental Education, Math, Science, and Social Studies. Note: PLT's listing of subjects is not based on Wisconsin's Model Academic Standards. Therefore, a subject might be listed by PLT and not address any standards. In addition, standards might be addressed in an activity without the subject being listed by PLT.

Project Sponsors

The Wisconsin Environmental Education Board provided funding for this project (grant number 2000-0019). Production would not have been possible without the assistance of the Wisconsin Department of Natural Resources and Wisconsin's PLT Advisory Committee. This correlation was completed and designed by Beth Mittermaier.

Mathematics

A. Mathematical Processes

Content Standard
Students in Wisconsin will draw on a broad body of mathematical knowledge and apply a variety of mathematical skills and strategies, including reasoning, oral and written communication, and the use of appropriate technology, when solving mathematical, real-world and nonroutine problems.

* Activity directly addresses the achievement of the standard.
* Activity reinforces or supports the achievement of the standard.

B. Number Operations and Relationships

Content Standard

Students in Wisconsin will use numbers effectively for various purposes, such as counting, measuring, estimating, and problem solving.

* Activity directly addresses the achievement of the standard.
* Activity reinforces or supports the achievement of the standard.

B.1 Represent and explain numbers
B.2 Determine the number of things in a set
B.3 Read, write, and order various numbers
B.4 Identify and represent equivalent fractions
B.5 Select and use appropriate computational procedures
B.6 Add and subtract fractions with like denominators
B.7 Read, represent, and interpret rational numbers
B.8 Perform and explain operations on rational numbers
B.9 Generate and explain equivalencies
B.10 Apply proportional thinking in problem situations
B.11 Express order relationships among rational numbers
B.12 Model and solve problems involving number-theory

B.13 Use appropriate computational procedures

Grade 8
Mathematics

C. Geometry

Content Standard

Students in Wisconsin will be able to use geometric concepts, relationships, and procedures to interpret, represent, and solve problems.

- Activity directly addresses the achievement of the standard.
- Activity reinforces or supports the achievement of the standard.

<table>

**Mathematics**

**D. Measurement**

**Content Standard**

Students in Wisconsin will select and use appropriate tools (including technology) and techniques to measure things to a specified degree of accuracy. They will use measurements in problem-solving situations.

- Activity directly addresses the achievement of the standard.
- Activity reinforces or supports the achievement of the standard.

Mathematics

E. Statistics and Probability

Content Standard

Students in Wisconsin will use data collection and analysis, statistics and probability in problem-solving situations, employing technology where appropriate.

* Activity directly addresses the achievement of the standard.
• Activity reinforces or supports the achievement of the standard.

</tbody>
</table>
Air Plants
Students will ① demonstrate and describe the general process of photosynthesis and ② explore the relationship between the amount of oxygen produced by plants and the amount of oxygen used by humans; Grades 3 – 6; Science, Math.
EE: B.4.1, B.8.7
M: B.4.5, B.8.7, D.4.5, D.8.4
S: F.4.4.

Air to Drive
Students will ① gain knowledge about possible global changes resulting from the emission of greenhouse gases and other pollutants and ② explain strategies for removing carbon dioxide from the air; Grades 5 – 8; Science, Math, Social Studies.
EE: B.8.10
M: B.8.7
SS: A.8.11, D.8.11

Birds and Worms
Students will ① simulate how predators use their vision to find prey, ② describe some different ways animals use camouflage for survival, and ③ invent a fictional animal that is camouflaged for its particular environment; Grades K – 6; Science, Math, Physical Education.
EE: B.4.6, B.8.8
M: A.4.2, E.4.3
S: F.4.1, F.4.4, F.8.2

Every Drop Counts
Students will ① monitor their daily actions and estimate the amount of water they use in a day, ② describe how water is wasted and why it is important to conserve it, ③ design and implement a water conservation plan, and ④ determine the amount of water and money saved through their plan; Grades 4 – 8; Science, Social Studies, Math.
SS: D.4.7, D.8.7, D.8.11

Every Tree for Itself
Students will ① simulate how trees compete for their essential needs and ② describe how varying amounts of light, water, and nutrients affect a tree's growth; Grades K – 8; Science, Math.
EE: B.8.8
M: A.4.2
S: F.4.1, F.4.2, F.4.4, F.8.9, F.8.10

Field, Forest, and Stream
Students will ① investigate and measure components in three different ecosystems, ② describe similarities and differences they observe among three ecosystems, and ③ identify ways that the abiotic components of an ecosystem affect the biotic components; Grades 4 – 8; Science, Math.
400-Acre Wood

Students will ① create a management plan for a hypothetical piece of public forest land, taking into account factors such as ecosystem stability, monetary income or costs, wildlife, water, and visitors and ② experience the analysis and decision making that goes into managing forest land; Grades 7 – 8; Science, Math, Social Studies.

M: A.8.1, B.8.2, E.8.4
SS: C.8.7, E.8.5

Germinating Giants

Students will ① measure certain physical characteristics of at least three different trees and ② compare various measurements from these trees and draw conclusions about the nature of each tree; Grades 4 – 6; Science, Math.

EE: B.4.6, B.8.8
S: F.4.3, F.8.2

How Big is Your Tree?

Students will ① measure and compare trees and tree parts, ② discuss how and why people measure things, including trees, and ③ explain the need for consistency in measuring; Grades 3 – 8; Science, Math, Social Studies.

S: C.4.2

How Plants Grow

Students will ① set up an experiment to determine what factors are necessary for plant growth and ② measure and compare plant growth under different environmental conditions; Grades 4 – 8; Science, Math.

M: A.4.2, D.4.4, D.8.3

Living with Fire

Students will ① describe a forest fire: how it starts, spreads, and burns out and ② explain several approaches to forest fire management; Grades 4 – 8; Science, Social Studies.

EE: B.8.5, B.8.23
M: E.4.1, E.4.5, E.8.2, E.8.4
S: F.4.4
SS: A.4.8

Loving It Too Much

Students will ① explain how increased numbers of park visitors and activities outside park boundaries affect ecosystems within national and local parks and ② offer possible solutions to problems facing national and local parks; Grades 6 – 8; Science, Language Arts, Social Studies.

ELA: A.8.4
EE: B.8.5, B.8.10, D.8.1, D.8.2
M: E.8.4
S: F.8.9, F.8.10
SS: D.8.5, D.8.11

Pass the Plants, Please

Students will ① identify edible plant parts and give examples of each, ② describe how plants are used to make various kinds of foods, and ③ discuss the importance of plants in people's diets; Part A: Grades K – 8, Part B: Grades 3 – 8, Part C: Grades PreK – 8; Science, Social Studies, Math, Language Arts.

M: A.4.2

Rain Reasons

Students will ① explore how variations in water, light, and temperature affect plant growth and ② describe how precipitation and geography can affect the plant and animal species that are found in a particular region; Grades 6 – 8; Science, Math, Social Studies.

M: A.8.1, D.8.3, E.8.4
SS: A.8.1
Reduce, Reuse, Recycle
Students will ① learn about ways to reduce solid waste in their community by reducing consumption, reusing products, recycling materials, and composting and ② communicate to others the importance of recycling in their community; Projects 1 and 2: Grades 4 – 8, Project 3: Grades 6 – 8; Science, Math, Social Studies, Language Arts.
ELA: B.4.1, B.4.2, E.8.3
M: A.8.3, B.8.7
S: E.4.7
SS: D.4.7, D.8.11, E.8.4

The Shape of Things
Students will identify common shapes appearing in the natural and built environment as a way of understanding the function of shapes; Part A: Grades PreK – K, Part B: Grades K – 3; Visual Arts, Language Arts, Math, Science.
M: C.4.1

Soil Stories
Students will ① identify components of soil and how these components determine its function, ② explain how different soil types determine the characteristics of ecosystems, and ③ predict the influence of soils on water filtration and on human use of an area; Grades 5 – 8; Science, Math, Social Studies.
EE: B.8.17, C.8.2
M: D.8.3, D.8.4, E.8.4
S: C.8.3, C.8.4, C.8.6, E.8.4

Sounds Around
Students will ① identify sounds and map their location in the environment, ② explain how noise can be a problem in the community, ③ create and carry out a plan to lessen a local noise problem, and ④ study a Greek myth about sounds in nature; Part A: Grades 1 – 6, Part B: Grades 6 – 8, Part C: Grades PreK – K; Science, Language Arts, Social Studies, Math.
ELA: C.4.2
M: D.8.3, E.8.1, E.8.2, E.8.4
S: C.8.4, C.8.6, D.8.8, F.8.2
SS: C.8.7, C.8.8, E.4.11, E.8.4

Trees as Habitats
Students will ① take inventory of the plants and animals that live on, in, and around trees and ② identify ways those animals and plants depend on trees for survival and, in turn, influence the trees; Grades 3 – 8; Science, Math, Social Studies, Visual Arts.
EE: A.4.1, A.4.2, A.4.3, A.4.4, B.4.6, B.8.8
M: A.4.2

Waste Watchers
Students will ① identify ways to save energy in their daily lives and ② explain how saving energy can reduce air pollution; Grades 5 – 8; Science, Math, Social Studies.
EE: B.8.17, B.8.18, B.8.21, D.8.5, D.8.6
M: A.8.1, B.8.7, D.8.3
S: E.8.4, E.8.6
SS: A.8.10, A.8.10, D.8.11
