

NAME _____ DATE _____

Corrugator Operator: I operate the machine that combines multiple sheets of paper to make corrugated products. I set up, adjust, and watch the machine for any issues.
Why is this job important? Explain.

Forest Engineer: I design and supervise the building of roads, trails, bridges, and other construction projects in managed forests. I also identify any impacts these projects may have on forests.
Why is this job important? Explain.

Logger: I harvest timber for building materials, furniture, paper, packaging, and many other products. My job is to cut the trees in a way that keeps water clean and ensures the health of the forest.
Why is this job important? Explain.

Package Designer: I use images, color, and type styles to make packaging attractive to customers. I also make sure that the package communicates the value of what's inside.
Why is this job important? Explain.

Packaging Engineer: I design packages that protect products during shipping and storing. I also test the packaging to make sure it is durable, safe, and meets customer needs.
Why is this job important? Explain.

GREEN JOB

CAREER CORNER

MAINTENANCE TECHNICIANS install, inspect, repair, and maintain equipment at corrugated manufacturing facilities. They make sure the machinery runs smoothly and troubleshoot any issues.

NAME _____ DATE _____

Paper Mill Manager: I coordinate workers at a paper mill. My job is to make sure the mill is running smoothly to create quality paper.
Why is this job important? Explain.

Park Ranger: I teach visitors about the forest and help keep them safe in the forest. I also enforce rules and laws to keep the forest safe from activities that could harm the forest.
Why is this job important? Explain.

Recycling Coordinator: I manage the recycling program for a city or company. I encourage people to recycle appropriate items, allowing materials like corrugated to be reused instead of wasted.
Why is this job important? Explain.

Wildland Firefighter: My job is to help protect and maintain the health of the forest by controlling and putting out wildfires. I also talk to the public about ways they can help prevent wildfires.
Why is this job important? Explain.

Wildlife Biologist: I study wildlife to understand what they need to thrive. I look at how birds, mammals, fish, reptiles, or amphibians depend on the forest and on each other.
Why is this job important? Explain.

CAREER CORNER

CUSTOMER SERVICE REPRESENTATIVES are the main point of contact for corrugated packaging customers. They manage orders, provide quotes, monitor projects, and provide internal support.
