

Name: _____

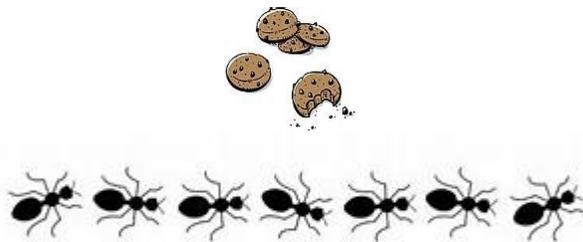

Observing uses all of our senses, including our sense of smell

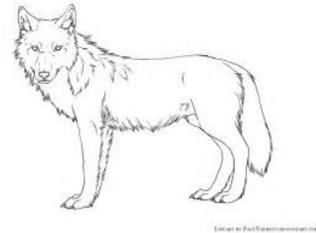

1. Think: How do insects and animals use SMELL?

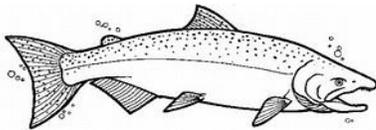

When worker ants find food, they leave a scent trail for other ants.

Wolves mark their territory to warn other wolves to stay out.

Salmon swim back to where they were born by remembering what the water smelled like there.

2. Draw: What you think a Peppermint Beetle might look like?

3. Count: How many trees were marked by the Peppermint Beetles?

_____ trees

4. **Notice:** What kinds of trees were visited by the Beetles? Circle:

Deciduous trees like maple and ash

Or...

Coniferous trees like pine and spruce

5. **Observe:** Which side of the tree was usually scented? Circle:

North

West-----East

South

6. **Consider:** Why do you think the beetles chose that side of the tree?

7. **Ponder:** What other questions do you have about Peppermint Beetles?
