CAREER CORNER

MEDIA COORDINATORS create content for a variety of media platforms. They may research, write, and edit information about an environmental topic, and plan and carry out outreach campaigns.

Circle the number showing how much you disagree or agree with each statement. A “1” indicates that you strongly disagree, and a “10” indicates that you strongly agree.

1. It is important for people to preserve wilderness areas.
2. The world’s natural resources exist for people to use.
3. Damage to the environment is the biggest problem facing humanity today.
4. People will eventually develop new technologies to cope with environmental problems.
5. People have a responsibility to protect all forms of life on Earth.
6. Protecting a country’s natural resources and natural heritage is primarily the government’s responsibility.
7. The government is doing a good job of protecting our country’s natural environment.
8. Recycling is the most important thing people can do to help improve the environment.
9. People should be able to use their own land in whatever way they see fit (for farming, housing, wildlife habitat, and so on).
10. All people have a right to clean air and water.
11. People using up natural resources is the greatest factor contributing to Earth’s environmental problems.
12. Use of energy-saving light bulbs should be required in all public buildings.
13. International treaties are needed to address Earth’s changing climate.
14. New energy production on the planet should be limited to carbon-free energy sources.
15. There should be laws restricting development on farmland or forestland outside cities or towns.
16. Zoning laws should prevent people from living in places that have a history of major forest fires.
