

TANGRAM PUZZLE

The tangram puzzle originated in China over 1,000 years ago. It is made of seven geometric pieces: five triangles, one square, and one rhomboid (parallelogram). The seven pieces can be arranged to create different objects, including people, animals, flowers, boats, and more. Make your own tangram puzzle out of paper, cardboard, poster board, or wood, and then invite children to see what new shapes they can create.
